

Medical Staff in the **SEC³URE Ethos**

Privilege providers in less time
than it takes to hard boil an egg

The Medical staff office has one of the most demanding jobs in healthcare.

Privileging and reappointing doctors takes a tremendous amount of work. Tracking down and primary sourcing the necessary information while relying on doctors or their authorized agents to complete the application constantly threatens your deadlines.

When provider credentialing is managed in the **SEC³URE Ethos**, we do all the work so you'll always have what you need to prepare for the committee. And once a privilege-ready file is completed, we make sure it's always 100% current and ready for peer-reviews when reappointments roll around.

Here's How it Works:

- + You give us your policies, bylaws, and reappointment schedule
- + We deliver privilege-ready files so you get them to committee faster
- + Our customer support Heroes do all the work for you

Here's What Life in the Ethos Looks Like For You:

- + You have more time to complete onboarding and prepare the committee files
- + You will onboard new providers in minutes with our privilege-ready files
- + You will get back all those wasted hours spent chasing down documents and loose ends

Only IntelliCentrics makes it easy for authorized agents to submit providers applications to you faster!

Here's the cool part, once your medical staff is on the system, the **SEC³URE Ethos** monitors all sanctions, credentials and privileges in real-time so that every provider is always current and trusted, making reappointment a breeze.

With IntelliCentrics, everyone wins.
