

Next level Compliance COVID-19 Credential

COVID-19 Credential to Meet Today's Needs. Flexibility to Realize Tomorrow's.

The COVID-19 vaccine will play a major role in our return to normal. However, access to the vaccine may take years given the tiered distribution model. This creates a compliance challenge for locations of care who need a solution today that clearly identifies which individuals can be trusted according to their unique policies.

IntelliCentrics' COVID-19 credential gives you all this and so much more. It is a total solution that addresses your needs today while being flexible enough to change without delay and virtually no effort on your behalf. It is a total solution that meets your compliance objectives while simultaneously considers every individual's unique circumstances when interacting with your location of care.

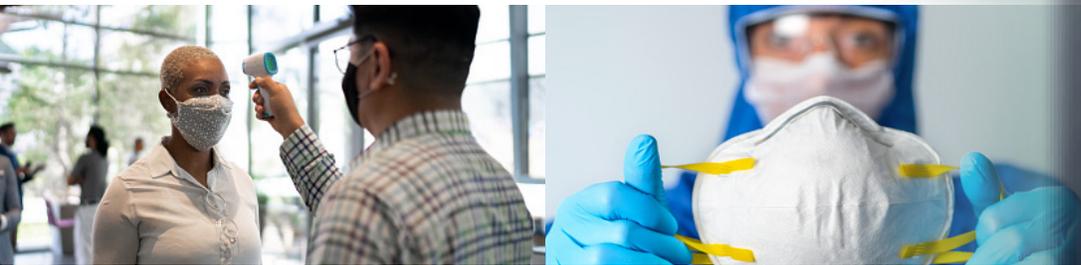

Experience Matters

Our flexibility comes from our experience. For example, individuals fortunate enough to receive the COVID-19 vaccine can rely upon their SEC³URE Passport to instantly communicate their status to our entire community. Meanwhile, each location of care can take comfort in knowing their policy requirements are met whether vaccines are a single immunization or a double. As a total solution, IntelliCentrics' COVID-19 credential solution delivers the same level of support to individuals who are not able to immediately access the vaccine. All based on your policies, we can support alternatives such as screening questions, temperature checks, N95 mask requirements, PCR, and antibody tests with monitoring of expiration dates just to name a few. Our total solution also supports you and the individuals who are unable to safely receive a vaccine. Notable exemptions are pregnancies, doctor's orders based on medical need, and faith-based reasons.

You're In Control

A total solution includes world class customer service. Your customer service Hero is ready to support you and your policies every step of the way. The best place to begin when considering policy changes and safe alternatives to a COVID-19 vaccine is looking at community best practices. You can take great comfort knowing our 11,000+ locations of care are all asking the same questions. You are always in control with IntelliCentrics. Our role is to ensure the entire community follows your policies when interacting with your location of care.

Everyone Wins with IntelliCentrics

The power of the IntelliCentrics community shines brightest when faced with a complex, ever changing landscape as presented by COVID-19. Our strategies for the COVID-19 credential are based on experiences gained from leading the IntelliCentrics community through SARS, H1N1, and all other vaccine/titer-based policies. This is another example of what we mean when we say *everyone wins with IntelliCentrics!*
