

Contactless Check-in
Visible Compliance

SEC³URE GO!

Your kiosk serves as an access control point to help you enforce the “no badge, no access” policy. However, if the computer system is down or the printer runs out of paper, the cascading effect of a non-functioning kiosk could have a negative impact on your facility’s compliance.

SEC³URE GO!, our wearable technology and one of the newest innovations, was created to make check-in easy, fast and contactless for all, while raising the level of compliance. The digital badge visually displays the user’s trusted status, as soon as they are checked in from their **SEC³URE mobile app**. Because check-in doesn’t require a kiosk, it also reduces the risk of surface contamination.

SEC³URE GO! alleviates the pain of kiosk upkeep and elevates the facility’s compliance.

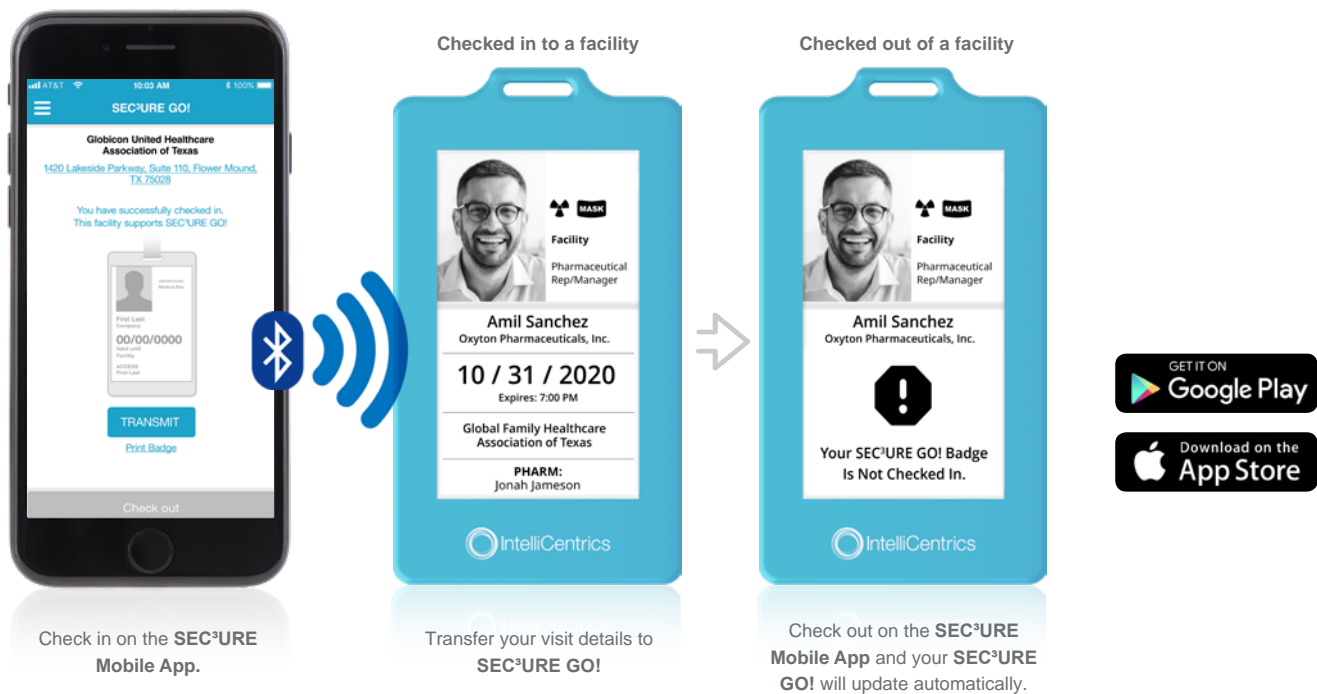

When you set up SEC³URE GO! as your primary check-in method:

- + You offload maintenance work at the kiosk and let your staff focus on other priorities.
- + Your commercial visitors experience contactless check-in and instant entry upon arrival.
- + Compliance becomes visible so your staff know who's trusted to be onsite or not.

SEC³URE GO! allows facility staff to easily identify who is visiting and compliant to be onsite.

SEC³URE GO! is available on our **SEC³URE Ethos** technology platform, which includes industry-leading innovations designed to improve the quality of care and reduce costs for everyone.

Everyone wins with IntelliCentrics.

SEC³URE GO!
