

# COVID-19 VACCINE CREDENTIAL FAQ

## SEC<sup>3</sup>URE FACILITIES

---

**Q: What is this new credential?**

A: We have added the new COVID-19 vaccine credential to SEC<sup>3</sup>URE.com, based on the CDC recommendations and your facilities' unique policy requirements. This credential helps manage compliance to the Federal and States mandates for those in healthcare services.

**Q: Does the credential apply to all facilities?**

A: No, but that's why we created the credential. If you need to enforce a COVID-19 policy to comply to Federal and State Department of Health mandates, this solution is for you!

**Q: Does the COVID-19 vaccine compliance get reported to me and included in my current analytics?**

A: Yes. You can manage your commercial and clinical visitors in real time, get reports and analytics the same way you have been doing on sec3ure.com and your SEC3URE facility app.

**Q: As a facility, how do I accommodate all the variables, exemptions, exclusions to comply with mandates?**

A: Our COVID-19 vaccine credential delivers the configurability to meet the latest CDC regulations and even the most complex state mandates based on your policies and procedures. It's built with tools and insight to ease the administrative burden of the seemingly endless different options. We assist you with a configuration tool that uses plain language and guided help to ease implementation of those unique requirements. We also have credentials to support your N95 mask fit tests.
