

SEC³URE ETHOS

for Medical Staff Office

The medical staff office has one of the most demanding jobs in healthcare. Privileging and reappointing doctors takes a tremendous amount of work. Tracking down and primary sourcing the necessary information while relying on doctors or their authorized agents to complete the application constantly threatens your deadlines.

When provider credentialing is managed in the SEC³URE Ethos, we make it easy for authorized agents to submit providers applications to you faster, and you always have what you need to prepare for the committee. Once a privilege-ready file is completed, we make sure it is current and ready for peer reviews when reappointments roll around.

777 International Parkway Suite 400
Flower Mound, TX 75022

Here's how it works:

- You give us your policies, bylaws, and reappointment schedule.
- We deliver privilege-ready files so you get them to committee faster.
- Our customer support Heroes do all the work for you.

Here's what life in the Ethos looks like for you:

- You have more time to complete onboarding and prepare the committee files.
- You will onboard new providers quickly with privilege-ready files.
- You will save time that would be spent chasing down documents and closing loose ends.
