

# SEC<sup>3</sup>URE Ethos

We all agree. When it comes to our loved ones, we will do whatever it takes to find the highest quality of care. This is why IntelliCentrics created the SEC<sup>3</sup>URE Ethos technology platform. Using trust as a technology, the SEC<sup>3</sup>URE Ethos is transforming how healthcare is delivered, received, and paid for.

The magic of the SEC<sup>3</sup>URE Ethos is built on the idea that everyone wins when interactions can be trusted across the complex spectrum of care. This includes interactions between doctors and patients, doctors and locations of care, and locations and vendors. And the SEC<sup>3</sup>URE Ethos doesn't stop there. This revolutionary idea also involves loved ones in the pursuit of the highest quality of care. By integrating love from family and friends with the vast resources of the healthcare industry, on one unified and trustworthy platform, everyone wins in the SEC<sup>3</sup>URE Ethos.

**IntelliCentrics stands alone as a trusted leader because we have built this community on three guiding principles:**

- **Neutrality**, which means everyone wins.
- **Transparency**, which means we'll never sell or share your data for our gain.
- **Independence**, which means, as a trusted third-party, we will govern the SEC<sup>3</sup>URE Ethos impartially, without bias and free from undue influence.

These principles are exemplified by our mission statement: It's our mission to use trust to make high-quality healthcare as accessible as a good cup of coffee.
